

Curriculum Vitae

Curtis Dunshee, MD

Professional License

AZ License 21385

Education:

Urology Residency, University of California, Irvine, CA	1989-1993
Internship in General Surgery, University of California, Irvine, CA	1987-1989
M.D. University of Arizona, College of Medicine, Tucson, AZ	1982-1987
BS University of Arizona, Tucson, AZ	1982

Publications:

1. Dunshee, C., Puthawala, A., Syed, N., and Shanberg, A.: “Laparoscopic [Pelvic Lymph Node Dissection and Irradiation with Iridium – 192 for Prostate Cancer](#).” Western Section ACS, January 18, 1992.
2. Slavis, S., Miller, J., Golji, H., and Dunshee, C.: “Comparison of Single-Dose Antibiotic Prophylaxis Versus Placebo in Uncomplicated Transurethral Resection of the Prostate.” J. Urology, Vol. 147, 1303-1306, May 1992.
3. Dunshee, C., Culling, A., Yamamura, H., and Davis, T.: “In-Vitro Beta-Endorphin Metabolism by Human Cerebrospinal Fluid.” Western Section American Federation for Clinical Research, February 9, 1984.

Awards and Honors

1989 Resident of the Year for Excellence in Student Teaching

Research Experience

Benign Prostatic Hypertrophy (BPH):

Phase II Multicenter, Randomized, 3 Dose Range, Parallel-Group, Sham-Controlled Double-Blind Clinical Evaluation of XXX for the treatment of BPH

Phase 2 Multicenter Randomized Two-Dose-Level and Non-Inferiority Clinical Evaluation of Transrectal and Transurethral Routes of Administration of XXX for the treatment of BPH

A Randomized, Double-Blind, Placebo-Controlled Trial of the Safety and Efficacy of

XXX in Patients with Lower Urinary Tract Symptoms (LUTS) due to Benign Prostatic Hypertrophy (BPH)

An eleven-week open-label randomized multicenter parallel-design, placebo lead-in study of XXX capsules. 0.4 mg daily vs YYY capsules 5mg wit (ZZZ) daily in patients with the signs and symptoms of BPH

A long term open-label extension study to assess the long term efficacy and safety of XXX in patients with Benign Prostatic Hyperplasia (BPH)

An open-label multicenter study of the effects and safety of XXX in patients with symptomatic Benign Prostatic Hyperplasia (BPH)

Superficial Bladder Cancer:

Pilot Study of the Intravesical Administration of XXX Immediately Following Transurethral Resection in Patients with Superficial Bladder Cancer

A Phase II study: Intravesical XXX in patients with Carcinoma In Situ of the Bladder who have failed or have Recurrence following treatment with YYY.

Prostate Cancer:

A Randomized, Double-Blind, Placebo-Controlled Study to Evaluate XXX in the Treatment of Bone Loss in Subjects Undergoing Androgen-Deprivation Therapy For Non-Metastatic Prostate Cancer

A Randomized, Double-Blind, Placebo-Controlled, Multicenter Phase 3 Study Of XXX on Prolonging Bone Metastasis-Free Survival in Men with Hormone-Refractory Prostate Cancer

A Randomized, Double-Blind, Placebo-Controlled, Parallel Group Study of the Efficacy and Safety of XXX 0.5mg Administered Orally Once Daily for Four Years to Reduce the Risk of Biopsy-Detectable Prostate Cancer

Evaluation of Biomarkers in the Diagnosis and Management of Prostate Disease

Phase I uptake study using a single dose of XXX (YYY) to determine prostate Tissue Concentration and Plasma Pharmacokinetics in patients with Prostate Cancer.

A randomized double-blind, placebo-controlled multicenter comparative safety and efficacy study of Intravenous XXX (4 and 8mg) in Prostate Cancer Patients With Metastatic Bone Lesions Receiving Antineoplastic Therapy

A Multicenter study of XXX-YYY in patients with Prostate Cancer in whom GnRH Agonists are Contraindicated.

A Phase III, Multicenter Open-label, Randomized Study of XXX-YYY vs ZZZ 1-month in patients with Prostate Cancer who are candidates for the Initial Hormonal Therapy

Erectile Dysfunction

An open non-comparative extension study of XXX in patients with Erectile Dysfunction

An open, non-comparative study to assess the long-term safety of XXX in Patients with Erectile Dysfunction

An open non-comparative study to assess the long-term safety of XXX in Diabetic Patients with Erectile Dysfunction

A multicenter, phase IIIB open-label study of Intracavernous injections of XXX in the treatment of Erectile Dysfunction in patients with insulin dependent Diabetes Mellitus

An open-label 13 month trial of oral XXX in patients with mild to moderate Erectile Dysfunction

A placebo-controlled, parallel-group, crossover design Phase III Trial of oral XXX in patients with Erectile Dysfunction

An open-label 24 month trial of 40mg oral XXX in patients with minimal Erectile Dysfunction

Prostate Intraepithelial Neoplasia (PIN)

A multicenter, phase IIb, four arm, dose finding, randomizing, placebo controlled Study to determine the long term Prostate Cancer Chemoprevention Efficacy And Safety of 20 mg. 40 mg & 60mg daily of XXX in men with high grade Prostate Intraepithelial Neoplasia (PIN)

Incontinence/ Bladder Overactivity

Safety and Efficacy of XXX Tablets in men with Bladder Overactivity and co-Existing bladder outlet obstruction. A multinational, randomized, double-blind And placebo controlled 12 week study.

Part A: Clinical Efficacy and Safety of XXX compared to YYY and Placebo- A Phase III randomized, double-blind, multinational study of patients with Detrusor Overactivity and symptoms of frequency urge incontinence and urgency

Part B: Long Term safety tolerability and clinical efficacy of XXX – phase III Open multinational study in patients with Detrusor overactivity and symptoms Of frequency, urge incontinence and urgency

Multicenter double-blind randomized study to compare the safety and efficacy Of oral XXX with that of YYY in the treatment of uncomplicated urinary tract Infections in women with (RW)

A randomized, double-blind, multicenter trial comparing XXX and YYY for the Treatment of complicated urinary tract infections
